Name _____

Period _____

Periodic Table I
Activity Sheet #2

Directions: This activity will allow you to become familiar with the arrangement of families on the periodic table. Use the blank periodic table provided to complete the instructions listed below.

1. Using colored pencils, color the elements in family "1A" green. The elements in this family or group are the Alkali Metals.
2. Using colored pencils, color the element in family "2A" yellow. The elements in the family or group are the Alkaline Earth Metals.
3. Using colored pencils, color the elements in the "B" groups orange. The elements in these groups are called the Transition Metals.
4. Using colored pencils, color the elements in family "8A" red. The elements in this family are called the Noble or Inert Gases.
5. Using the colored pencils, color the elements in family "7A" blue. The elements in this family are called Halogens.
6. Using the colored pencils, color the elements in family "6A" brown. The elements in this family are called Chalcogens.
7. Using the colored pencils, color the elements in the Lanthanide Series pink.
8. Using the colored pencils, color the elements in the Actinide Series purple.
9. Do not color the elements in families "3A, 4A, and 5A". In these families, the elements Boron, Silicon, Germanium, Arsenic, Antimony, and Tellurium are Metalloids.
10. The remaining elements to the left of the stair-step line are metals, while the elements to the right of the stair-step line are non-metals.
11. Make a legend, indicating the colors used and the families these colors represent.
